

Georgia Sky Watch

Issue No. 2

The newsletter for Georgia MUFON members

December 1995

Getting Started

by John C. Thompson

From aspiring field investigators I hear it often: "I must not be in the loop." Or, "There's nothing happening where I am." And, the all too familiar, "I'm too busy." All sometimes true, but not the real reasons why most in MUFON never start investigating.

We all know the real reason, and it has little to do with any of the above. Chris Early, MUFON State Director for Georgia, addressed the issue recently in an interview with TV-33, LaGrange.

Saying "... anybody that gets involved knows they may be ridiculed," he expressed all of our fears of why we are so reluctant to openly investigate the UFO phenomenon. We all want to be thought of as reasonable, well-adjusted people; not whacko UFO nuts. Unfortunately, despite your most noble efforts, there will always be some, on finding out you are a UFO investigator, who will persist in believing you're a basket case. So to first get started, you need a thick skin. To get that tough hide you have to be proud of what you do.

As a MUFON field investigator, you are part of an elite team of special people that have unique talents. You are part of that select group of people. You have something special to contribute that nobody else can offer; all it takes is for you to cross that wide chasm of self-doubt.

Next get a *MUFON Field Investigator's Manual*. It is invaluable for your investigations, and has copies of all the reports you will need to use. Study the manual and carry it whenever you go out into the field.

Remember the identification card our International Director, Walt Andrus, sent you? Take it out of the drawer you threw it into, and have your picture mounted on it. Then laminate the card and keep it in your wallet. And, oh yes: Use it

occasionally. But before flashing it around, get some business cards printed up to leave behind while UFOing.

Let the police, the fire department, and radio-TV stations in your area know you're a MUFON field investigator. Tell your friends, and some family -- I won't tell you to tell'em all -- and even associates at work, what you're doing. If you don't, how else do you expect to get leads?

No Maytag repairmen need apply for field investigator; self-starters only! Now that you've got the mindset, get off your rear and investigate. Ask...ask...ask! Talk UFOs up, and while doing so be careful to listen. You'll hear the darndest things. People in your very midst have seen UFOs, or can put you on to others that have. If you're self-employed -- as I am -- you have an instant gold-mine. Just let them know you're a UFO investigator, and if they've seen anything, a flood of sightings and alien activity will descend on you.

Personally, I like to take the direct approach. Tacked on the wall of my insurance agency is a sign that asks in big bold red letters: "Have you seen a UFO?" You'd be surprised how many canaries sing on

The **Georgia Sky Watch** newsletter is an open forum for the exchange of ideas and information concerning UFOs and related phenomena. Opinions expressed by contributing writers are those of the particular author and do not necessarily reflect the views of **Georgia Sky Watch** or its editors and publishers.

Georgia Sky Watch is issued irregularly. Send all inquiries to:

P. O. Box 399
Carrollton, GA 30117
Phone: (770) 832-8311

Subscription rates in U.S. funds are as follows:

United States: \$12.00 /year
Foreign: \$20.00 /year

Articles, news clippings and letters are welcome.

Editor: Mark Ausmus
Associate Editor: Daniel Sharpe

reading this one. From that sign alone, I've gotten some spectacular cases. Should they miss it, I ask.

Seek out old-timers that live in rural areas; they're always good for sightings and info about neighbors who might've had some strange alien experiences. Check out the "project" folk too; aliens seem to like to buzz them -- maybe they know most will not believe these people even if they do tell.

There's a racial dimension to investigating too. You'll find that black folk are more willing to open up, and the good ol' boys, if they don't know you personally, want only to tell you stories on the phone. Whites in general are more reluctant to meet personally with you, and often flinch when trying to get them to sign at the bottom of MUFON forms. You see, they're more afraid of ridicule than you are.

Whatever you do, don't push! Just remember, nobody is paying UFO witnesses to bare their souls to you. If resistance becomes too strong, cut your losses and move on.

Pursue all leads. Sometimes the most insignificant piece of information can yield big results. For example, while checking out a story of a crashed boomerang UFO in Heard county, it lead me to others who had seen more recent UFOs in this same area.

(Regrettably, I still only have one witness to the crash story.)

Document your cases. If possible, and if permissible, video tape them. If you have some older children who have an interest in UFOs, let them help you. My teenage boys sometimes go with me, and help video my subjects. Surprisingly, most witnesses are glad to see an alert child, as that lets them know you're not completely whacko! Whatever it takes to keep them calm, do it. Milk them for every bit of information you can. But always be polite and honest.

Show them UFO books. Particularly ones with lots of UFO pictures. Make a demo tape of UFO films and share any general information you have of other sightings and abductions similar to theirs without compromising your sources. That's most important: You can talk, but keep the specifics and names to yourself.

**Pursue all leads.
Sometimes the most
insignificant piece of
information can yield big
results.**

Finally, look like a professional. This is the conservative South. If you don't it will only give too many a good excuse to slam the door in your face. Be practical, and sell those around you on the fact that the UFO phenomenon is real, and worth investigating. In all honesty, field work is as much sales as investigating.

So come out of the closet, get your cards, spread your message, and start investigating. You'll be amazed how many cases you soon turn up.

You can continue to watch "X-Files," or live "X-Files."

Personally, I like living.

Message From the Editor

It's that time of year again -- Christmas and the New Year holidays. Every year I leave the Arcturus catalogue laying about the house in a convenient spot hoping that friends and family will take notice. Every Christmas morning I awake looking for a box full of nifty UFO books and magazines under the tree. Every year there are more shirts and ties. What am I doing wrong? Do you think they will read this newsletter and take the hint? Oh well ... I guess I can always use clothing. Sigh.

This is also the time of year for reflection. 1995 was a slow year for Georgia MUFON. We only had one meeting (2/26/95), but it was a good one. Michael Norris gave an excellent presentation on UFOs and related phenomena.

1995 did see the inception of *Georgia Skywatch* and two issues

were mailed. That was two more issues than the year before and two more issues than the year before that. So we did move in the right direction, albeit -- slowly. That is all changing, even as I write these words.

Several new officers were recently appointed. Jim Clifford was appointed treasurer. Henry and Kelly Owens took on the responsibilities of public relations officers. Henry and Kelly are infusing tremendous amounts of time and energy into Georgia MUFON. Make plans to attend the January 13th meeting and you will see and hear for yourself how Georgia MUFON in 1996 will be nothing like sleepy old Georgia MUFON of 1995. Great things are about to happen.

1995 also saw MUFON member Ed Komarek launch his bid to run for Congress promising he would try to get secret UFO documents released. Good luck Ed! We'll vote for you.

Although not a MUFON function, the *32nd Annual National UFO Conference* came to Atlanta in mid October. Speakers included James Moseley of *Saucer News/Saucer Smear* fame, George Fawcette and Frank Stranges; all veterans of the UFO phenomenon since the 1950s. Each has been written about and all have been published extensively throughout the years.

Speaking of veterans, we are extremely lucky to have Chris Early guiding Georgia MUFON. With over forty years of investigation and involvement with UFOs, Chris truly possesses wisdom. His article starts on this page.

Also in this issue, Susan Daniel gives five stars to *UFOs: It Has Begun*. Check it out. And if you're into conspiracies, check out Joye Pugh's article "The UFO Brief."

I would like to wish each and every one of you a Happy Holidays!

UFOs: A Great Mystery

by S. Christopher Early
Georgia MUFON State Director

"WHY DON'T THEY LAND ON THE WHITE HOUSE LAWN?" After being shot at and chased by jet interceptors all of these years, they know better. After all, in 1952, they visited Washington, D.C. for several weekends, were tracked on radar and witnessed by many. Upon entering the restricted air corridor over the White House, jets were scrambled to intercept the unwanted intruders. This policy of shoot first and ask questions later, regarding UFOs, has remained intact since that time. Our government, with its wealth of information, can't agree on the budget,

much less UFOs. Why would any alien intelligence want to make contact with such a hostile group of beings?

Curiosity, being what it is, causes our scientists to seek electromagnetic signals from intelligent civilizations in distant space. The human ego, being what it is, will not allow them to believe that visitors from distant planets could already be here.

From 1947 and before there have been literally hundreds of thousands of sightings throughout the world. All of these people can't be faking it. UFOs represent a great mystery. And how about all of the physical evidence? We have many photographs, electromagnetic effects cases, sightings of ships with colored lights and gassy shrouds, possible pseudogravitational attraction, radar sightings and immense acceleration cases, that defy our laws of

Physics. The scientific community will not examine the data because they, like many others, are afraid of ridicule.

I can understand anyone who has a job and is reluctant to identify with the UFO subject. UFOs just don't fit into our egocentric view world. Just two hundred years ago, anyone confronted with airplanes, automobiles, TV, electric lights, trips to the moon, and computers would not believe it! If something more advanced comes to us from some place in the universe, or another dimension, we, like those of old, are reluctant to accept its presence.

The ridicule factor surrounding UFOs is brought about by those who embellish their stories with science fiction and by those with few credentials,

**UFOs are telling us to
look within ourselves and
see what we are doing to
this planet.**

who set themselves up as authorities in order to make a quick buck. Disinformation is often injected into what otherwise would be good data. The end result is that fact cannot be separated from fiction. Some of our best UFO investigators wind up in violent disagreement over what happened when, where and to whom.

Is there a message? UFOs must know a lot about us. I believe they reveal just enough to get the wheels in our brain turning. We UFO investigators are a special lot. We probably will be the first ones to walk through the window of a new reality. We are curious and want to know the truth, whatever that is. I believe they want to change something in us, so that we begin to examine our spiritual values.

Perhaps there are those that might seem good, or evil, who come from different places. Read "Childhood's End," a classic by Author C. Clarke.

Is it morally right for an entity to take someone from their bedroom in the middle of the night for an examination aboard their spaceship? Like the KGB, they don't ask ... they just do it. I hate this. Some people find it mentally disturbing. In those

cases, I suggest prayer to a higher being. Others use the experience to attract attention to themselves.

What is reality anyway? We know it is framed somewhere in the gray matter at the top of the spine. It must be some sort of composite of all our sensations and experiences in life. Perhaps no two humans have the same concept of reality. Do you ask yourself questions such as: Who am I? Where did I come from? Where will I go after this world? You are one that can say I AM. No other plant or animal can contemplate this. In religious history this simple profound awareness is allied with God.

UFOs are telling us to look within ourselves and see what we are doing to this planet. We can not exploit it forever. Material greed can swallow us. Developers will not leave a square foot of nature for our children to enjoy. Fossil fuel can be burned at such a rate that the heat will have no where to go! Nuclear fuel rods can proliferate to the point of being a living Frankenstein!

If a very advanced entity in the universe wanted to reveal himself to man, knowing man's simplicity, how would he do it? Perhaps with his advanced knowledge of genetics, he could impregnate the ideal virgin from a disciplined race of people he had earlier hammered out at the anvil of time. The messiah would possess the nature of his father who is UNSEEN! One who could raise the dead and cause the blind to see! Best of all, to cause those that love

**... they want to change
something in us, so that
we begin to examine our
spiritual values ...**

him to have bountiful lives, regardless of adversity, and have the will to preserve the beautiful planet his father created.

There are those who do not believe, no matter what they see. They want exact personages, or idols, at an exact time and place in history. People such as this will never allow themselves to look seriously at the evidence which has been amassed to make the case for the UFO. The children of Israel followed a pillar

of light by night and a cloud by day, into the wilderness for over forty years. They were fed each morning by Manna which fell from the sky. What did they do? They cast a golden calf and worshipped it.

UFOs: It Has Begun

Reviewed by: Susan Daniel

Recently I had an opportunity to watch "UFO's, It Has Begun", a film written by Robert Emenegger, author of "UFO's Past, Present & Future." This film, released in the late 1970's, is a wonderful overview of the subject and contains important historical footage. It is available from UFO Central Home Video for \$34.95.

Hosted by Rod Serling, the film proceeds in a logical and well-paced manner through most facets of the UFO phenomenon.

The beginning of the film deals with accounts from ancient times, including the Bible and the Greek and Roman eras. Accounts of sightings in the time of Charlemagne in 9th Century France are also touched on.

Next, Jacques Vallee reminds us that UFO sightings in the modern world are not just an American phenomenon but one that is worldwide. He mentions sightings in Africa, Latin America, Scandinavia, China and the former Soviet Union.

Narrated from the Pentagon by Col. Bill Coleman, former Chief of Public Information for the United States Air Force, the next area of the film discusses the Air Force and NASA involvement in the UFO phenomenon. He mentions specific sightings during Gemini and Apollo space missions and a sighting from Skylab in 1973.

Dr. J. Allen Hynek relates his experience as a junior member on the landmark "Robertson Panel", created in 1953, by the CIA, to evaluate UFO sightings. He discusses how the panel reviewed the Utah and Great Falls, Montana films, concluding that "the objects must be birds", although thousands of hours of analysis had shown them to be self-luminous objects traveling at great speeds.

One of the most interesting cases in the film is narrated by Robert Friend, former leader of Project Blue Book. A woman known as "Mrs. S", when in a

trance, was able to answer technically complex questions beyond the ability of someone with her background. She supposedly received the answers from a group of extraterrestrials who formed the "OEEV" or Universal Association of Planets. The entity surprised investigators by offering to communicate through one of the Naval Intelligence officers. In this medium, he told them to go to the window and they would see a UFO. They did!

Many famous cases are presented such as the Mantel case and the Chiles-Whitted case which prompted the Air Force to form Project Sign (Project Blue Book's predecessor). Al Chop, former Air Force Public Relations officer relives his experiences of 1952 as UFO's were repeatedly seen over Washington, D.C., violating White House air space. The 1966 in Hillsdale and Dexter, Michigan case, where Dr. Hynek

She supposedly received the answers from a group of extraterrestrials who formed the "OEEV" or Universal Association of Planets.

made his now infamous remark about swamp gas. The Socorro, New Mexico sighting where an alien craft left important physical evidence. The 1973 Coyne military helicopter encounter with a "cigar shaped" object of tremendous size in Port Columbus, Ohio.

The film also explores the ramifications of cattle mutilations, what they might mean and the fact that in New Mexico and Colorado there were craft sightings shortly before the mutilations.

An Abductee story about "Helen" who says she was "beamed up" to a spacecraft is also included. The molecules of her body were dispersed and she was given instruction by peaceful and intelligent beings. She says she remembered nothing until under hypnosis.

The conclusion of the film asks many questions: If these beings do come to Earth, what do

they want? Would we unite as a species to protect ourselves? Do these beings possess knowledge that can advance our civilization, such as alternative energy sources? Finally, is our contact with them letting us see ourselves as we may be in the future? It shows a simulation of a possible future encounter, or perhaps one that has already happened, where aliens land at a military installation and are greeted by our government.

If you haven't seen "UFO's: It Has Begun" rush right out and buy it, or borrow it from a friend. This is definitely one of the best UFO documentaries available. Five stars. A must see.

The UFO Brief

By Dr. Joye Pugh, Ed.D.

The Question?

After much research and viewing such films as THE FIRM and THE PELICAN BRIEF, I am pondering the following question: Do the Illuminati, the upper GODS of Free Masonry, control the UFO cover-up? Does their relationship to the famous Bilderberger Group, which author Texe Marrs (See "DARK MAJESTY") and others say control the world, give them the power to secretly house all UFO information? Are they George Orwell's BIG BROTHER?

The Quest

In an extensive review of history, one will soon discover that the Knights Templar were always in search of higher knowledge. Their quest for the ARK OF THE COVENANT and THE HOLY GRAIL is written about in a variety of books throughout history. Interesting items regarding their secret meetings and rituals, which involved blood oaths, are not included in most books. In fact, not until the last couple of years have initiates of Free Masonry defected. They explain how the oaths they take make them fear being killed by the Secret Brotherhood. Men who have confessed about the blood oaths they took to get to the thirty-third degree have painted a clear picture of this

secret organization and its true meaning. Free Masonry exists in almost every county in our country, as well as abroad, and literally controls its' members.

Most local chapters of Masons, Grand Orient Lodge, and the Scottish Rite are not aware of the true

**You belong to them
forever or you cease to
exist.**

meaning behind their organizations. They do not realize that they are raising money for under-cover projects which use Children's Hospitals, etc. as a sheepskin to hide behind. In researching where the fund-raising money goes, several television shows have uncovered evidence that this is a well kept secret. It reminds one of the secret projects our congress is funding but knows nothing about.

Does it mean that all thirty-third degree Masons know what is going on? No. In fact, they are not privy to that information. There are other degrees above the publicized thirty-third degree that few men are aware of. If chosen to go higher in these levels, one must forsake all for the Brotherhood. Like THE FIRM and THE HOTEL CALIFORNIA, you can never leave. You belong to them forever or you cease to exist.

How Does the Secret Brotherhood Control?

The Brotherhood or Illuminati are controlled by members of a group called the Bilderbergers. The most powerful and wealthy of the world are members of this group. They have established The Trilateral Commission and The Council on Foreign Relations. They own the Monetary Trust Fund -- they own the world. They pick the candidates who will run for top offices in all countries and then they let peons like you and me think we have a choice in government. We are their puppets and we can do nothing about it. Not one of those who have made it to the top will ever come forward for they will be eliminated based on their oaths.

UFO's Controlled?

Why does our government constantly tell us that they do not have a facility called Groom Lake or Area 51 or Dream Land? Maybe they really do not. Maybe it belongs to an independent FIRM. One that secures government funds without Congress's awareness.

Why are there few documents regarding UFOs in government files? Maybe they are purged and sent to a secret organization that only the top officials know exists. The possibility exists that the Brotherhood knows extraterrestrials exist or they themselves are the extraterrestrials.

The Plan

Could it be that the plan to control the entire world is finally here? Is it possible that Big Brother is capable of watching every person on the face of this Earth? The Cold War is over, so why have spy satellites? Maybe they are up there to watch you and me. If we fail to comply with the up and coming NEW WORLD ORDER, does the Brotherhood have something that will force us into doing exactly what they say? Do they have the capability to own our souls?

If we can be levitated
through windows and
walls, then Albert
Einstein's Unified Field
Theory is in the hands of
an evil genius.

Abductions?

If true abductions exist, it tells us that we cannot control an entity that defies our present understanding of life. If we can be levitated through windows and walls, then Albert Einstein's Unified Field Theory is in the hands of an evil genius. Who is the EVIL one?

Could it be that the Secret Brotherhood has invented such technology? They do have the money and the power to employ the best scientists to work on their behalf.

Does the Brotherhood know the true identities of the UFOs? They have the money, manpower, and

**The Brotherhood has
worked hard over the
centuries to become the
owners of the world and
they are not going to give
it up to any alien.**

control to get their hands on every alien or space craft that may exist. The Brotherhood has worked hard over the centuries to become the owners of the world and they are not going to give it up to any alien. The Brotherhood does not want the public to know what is going on because it might destroy our present form of government. The owners of the world never want that to happen. They have set the date of 2000 A.D. as the beginning of THE NEW WORLD ORDER. They promote the NEW AGE ideology constantly. All of it comes from Agnosticism. They believe they are illuminated and are GODS. They believe they have been chosen to lead us poor peons to the new world. What better way to push us into being submissive than through abductions.

Good or Evil?

Whether we like it or not we are controlled. We are becoming more controlled everyday. Before long we will have computers everywhere so we can be monitored. With chips implanted under our skin; we can be tracked. Could the nose implants be the forerunner of skin implants? Any way we look at it, they are working diligently to make sure that we will not be able to escape. UFOs have been allowed to abuse us through abductions. They have controlled large portions of the public. Most individuals,

participating in surveys, believe the possibility that other intelligent beings may exist.

Someone is playing the game of good and evil with our world. That Someone is here on Earth and does not want us to know the truth. They only give us bits and pieces of what they want us to know. The keep things like wars, racial strife, politics, money and the news media in turmoil so that the average person does not have the time to investigate the evil plots and plans which are being devised daily. There is one thing for certain -- some one on Earth is behind the Great Oz and believe me it is a Wizard of a lizard.

In Summary

Until Ufologists tackle the aspects of the cover-up by an agency outside of the government, our chances of securing the facts on UFOs are nil. Too many government officials are not aware of UFOs because they are not privy to the information. It is my belief that something of this magnitude, as well as the consequences of revealing UFOs, has to be kept very secretive. To keep this secret quiet it would require the most powerful people to back it. The Illuminati or Secret Brotherhood do have the manpower and the means to control the UFO cover-up. How we as Ufologists approach their control is another question. Our own government is unsuccessful in the fight against these powerful men. It is evident that this spider web of bureaucracy has a huge spider devouring each UFO morsel into its' stomach. "You are mine", said the Spider to the FLY...

LETTER FROM THE PUBLIC RELATIONS DEPARTMENT

by Henry Owens

TAKE ME TO YOUR LEADER!!

Finally, MUFON of Georgia will be having regular monthly meetings starting January 13! The meetings

will be held the 2nd Saturday of every month at 7:00pm. Field Investigator Training Classes will also be held on these days at 5:00pm. The meetings will include discussions on various topics, case summaries and guest speakers. Bring your ideas and any materials you would like to share or contribute to the organization to the meetings.

MUFON of Georgia is sending out letters to Police and Fire Departments, Highway Patrol, Radio and TV, College Science Departments, Airports, Military Bases and Emergency Management Services. There will also be MUFON information cards for everyone to distribute to libraries and public bulletin boards, etc. We are also organizing sky watches and group trips to Gulf Breeze, FL and The International UFO MUFON Symposium in Greensboro, NC.

To get directions to the meetings just call one of the new Georgia MUFON Hotline numbers: (770) 935-7865 or if you are outside the Metro Atlanta area, call toll free (800) 860-1000 ext. 877386. This number is available 24 hrs. a day. The new fax number is (770) 242-3859 and a 24 hr. pager number of (770) 259-3813. We hope to see you there!
