"Be friendly," said Betty Hill, when asked how people should respond to visitors from other solar systems. She also recommended that people not approach a landed UFO, pecause they are "not offensive but will protect themselves from us.

Hill was the key speaker at the Mutual UFO Network, held at Yoken's Conference

uncovered in each session. After about six months of hypnosis, Simon played th recordings of the sessions to the Hills, and they discovered

they had supposedly been abducted and had undergone physical examination. They were "puzzled over the fact that Barney's teeth

were removable and mine were not," Hill said in a description of the examination. The aliens took hair, skin, saliva and nail samples. She said the next day she found her blue earrings that she lost the night of the alleged abduction or her kitchen table. She was grateful the earrings had beer returned to her.

Close Encounters of a different kind come to N.H. - I IFOs frequently over the Portsmouth sky, bu -- between September New Hampshire Mutual UFO Netwe Senterday. The good news – defined and ing on your frequent flyer plan – is that many peopl have already survived an many is the audience looking for telltale "acrop" marks that indicate a tlasue sample has bedrate a tlasue sample has been by shear by It was the kind of erowd. Peter Geremis began In-vestigning UFO mparts in New Hampshire more than 16 years ago, and hay been the Muton state di-vector since 1977. He will share some of New Hampahire's most spectacular UFO cases accompanied by photographs, flue

Gerry Hill is one of the most fe-mous UFO personalities in Ame-ica. Her and her husband's en-counter with aliens in 1961 remains counter with aliens in 1961 remains one of the best-discummental abduc-tion cases in UFO history. Their ansaucter was the subject of John G. Pulker's best calling book "The Interrupted Journey" and was also the subject of a TV movie "UFO Incident." Betty, a lifelong resi-dent of New Hampehire, is a retired social worker who currently lives in Portsmouth:

Budd Hopkins is America's foremost authority on UFO abduc-tion cases. Heis also the author of two HFO boots: "Missing Time"

### NH. MUFON CASE LOG

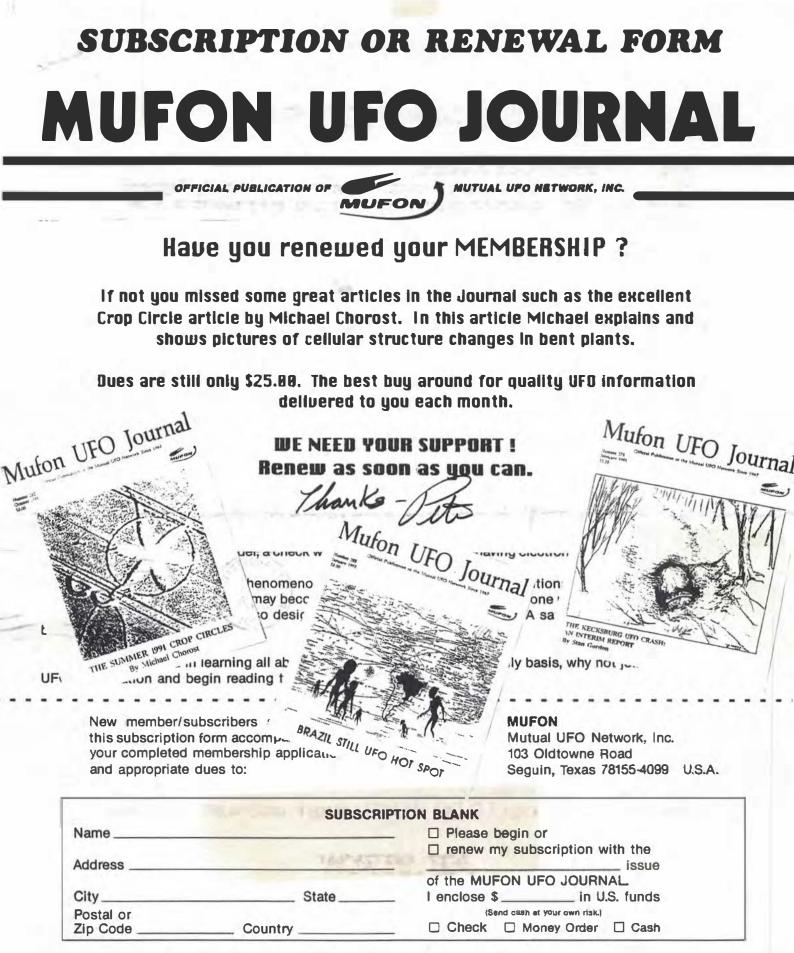

#### Double Disc in Loudon:

Date: 11 September 1991 Time: 7:30 PM Place: Loudon, NH.

A mother was driving home from attending an open house at the local school with her two children. The daughter is six years of age and her son is ten. The trip started normally with no problems. The car radio was tuned to Rock 101. As she entered the dead end street where they live, the radio started to static to such a degree she had to turn it off. This was unusual as 101 always comes in clearly near her home. She parked the car in her driveway and immediately went inside the house to untie the dog who was tied in the kitchen. Before she could get the dog untied her daughter yelled for her to come outside to see something. Outside she found her two children looking up at two large white discs moving slowly past the house. the discs were identical in shape and light configuration. Surrounding the edge of each disc were a series of pastel multi colored lights pulsating in a random order. Directly under the discs were three dark circles in a triangle pattern centered on the bottom. Each disc was the size of a small house moving side by side. A low pitched hum was barley audible. She estimates the altitude of the discs at about two houses high or approximately one hundred feet. The brightness of the craft was such that she could see the ground lighted as they slowly moved out of sight. The speed was said to be barley moving but may have increased slightly as she got outside to look up at the underside. The two craft glided out of sight toward Canterbury. I would like to say this was the end of a remarkable CE Il case. This however is not the situation. Shortly thereafter all three witnesses started having strange health symptoms. The little girl started having stomach pain, fever and a personality change. The boy suffered a major personality change. The mother started to bruise very easily and in a short time had multiple bruises on her legs and arms. To this day the boy is severely impacted to a point where he will cry if asked to talk about the sighting. With tears in his eyes he asked me why are they here at my house?. It must be mentioned here that the mother did not believe in the existence of UFOs prior to the sighting and due to the trauma it caused, morn and dad don't talk about UFOs or related subjects with the children. Well as luck would have it the father became involved in the situation on the night of 13 November 1991. He got up from bed at about 3:20 AM to go to the bathroom. This is not unusual for him. As he sat on the edge of the bed he was startled to see a horizontal beam of bright white light shining across the sliding glass doors of the bedroom. The beam was about four inches thick and lasted for about ten seconds. Shortly thereafter it came on again but this time at a forty five degree angle across the doors. Again it lasted for about ten seconds. Needless to say he was upset and asked me what the hell is going on. (It sure would be nice if we had answers to all the questions). We are still working the case and will keep you informed.

#### Weird Tracks in the snow:

A man in Rochester who is having strange happenings in and around his home found strange tracks in the snow. He took pictures...I took pictures. At first glance they looked like four toed little monster tracks. After a little research we decided he found the Mother of all beaver tracks. It was fun tracking down the tracks.
