Text of Sighting:

Statement of Witness

On the evening of Nov. 27 I was asked by my mother to hang some wet clothes on the line in back of our house. I took the clothes to the garage/clothesline area and hung them up. As I was hanging up the last article, I happened to turn to my right on my way into the house and something red glimmered at the edge of my vision up

in the sky. I focused on it and observed a red sphere exactly the color of a red highway flare above the hedges of my neighbor's house across the alleyway. I first thought someone had fired a signal flare, but there had been no dull report indicating that such a flare had been launched. The second thing that bothered me was that this object did not float down normally like a flare would, but instead hovered in the air.

Observing the object carefully (I thought perhaps I had a sighting on my hands) I kept thinking how weird this light was, hanging there in the middle of nowhere. Running through the possibilities, I thought perhaps someone had sprinkled highway flare chemical on a piece of newspaper and tossed it up in the air -- and that maybe the hot gas from the burning paper was keeping this object airborne. The object had a definite burning/luminous output to it, but the light level remained perfectly steady, with a momentary fluctuation which occurred twice for only a few tenths of a second, as if a waft of air had affected it slightly. The illumination only dipped about ten percent during this event, which occurred about seven seconds into the sighting. After this, the light began its descent, no flickering.)

There was no one else around, nor, now that I think of it, was any other noise being made (natural or man-made) within my hearing at the time of the sighting. It was very eerie, but not frightening, having a type of other-worldly quality to it, but not clearly describable. (Also, as I thought to run a check on it at the time, having a certain proficiency in astral sight? I checked and the object was definitely manifesting into the range of physical, normal vision.) This was a definite physical event. I did not think to check for any energy fields off the sphere (I was too engaged in the actual physical sighting.) I thought at the object to see if it would communicate, respond or exchange information with me. No reaction. I waved at the object, beckoning and calling the object to come over to where I was. No reaction.

The object during this time did exhibit a peculiar, slightly erratic but otherwise interpretable movement as being independent of motion, as if it could move where it liked, but didn't actually choose to. At least, this is the impression I received at the time. (It acted about as aloof and independent as a cat.) The object vanished from view about 10 - 12 seconds into the sighting (the object was not obscured at any time, although reliable size, distance and location measurements could be made from the excellent nearby physical references.) When it disappeared, the object vanished very much like a carbon arc spotlight; it gave the impression of just disappearing, the total time from maximum brightness to vanishing being about sec.; there was no impression of a burnout, just a slight dimming about 30% then a non-emission of any kind of light whatsoever to the visible eye. No debris was seen falling from the sphere or found in the area, although the possibility cannot be completely eliminated, as this particular point in the investigation is the weakest, as the search was not thorough and did not occur for more than 90 min. following the sighting, at the suggestion of Investigator Ann Druffel.

many miles away.

Bur the object was definitely emitting energy, much the way a highway flare will when you are a close to ir.

There were no unusual noises present after the sighting, no dogs barked (except at all my running around after the sighting), nor did peculiar electrical occurrances turn up to my knowledge. There are two interesting factors to keep in mind: the sighting occurred in the vicinity of a very tall, single element aluminum radio antennal with base radials, although the ball did not appear attracted to the antenna, and the sighting occurred within ten feet or so of a high tension or telephone cable (I cannot be sure of the nature of the cable.) Again, the ball did not appear interested in the cable, or much of anything, except to float around very leisurely in the air.

Total movement of the sphere at this sighting was 8 - 10 feet, moving approximately six feet in an upwards direction, floating, then in a generally downward direction for the remaining 2 - 4 feet. The ball did hover in between these maneuvers, so it was not a simple case of a projectile following some kind of parabolic curve. (Hovering lasted from about seconds 2 - 6 into the sighting.)

At this time, (6:05 PM) I went back into the house to pick up some more clothing for the line outside. As I remember it, my mother followed me outside with some things and as we were hanging up the items, I remarked about "this funny thing that happened" and began describing the ball of red light, where it was, etc.

As I pointed to where it was, I cleared some bamboo and <u>again</u> sighted the object, apparently the same size, exhibiting the same behavior, 250-300 feet south down the alleyway over the backyards of the houses down the street. I grabbed my mother's elbow and pulled her clear of the bamboo, shouting, "Look!" but by the time she had a clear view, the object was gone. Duration of second sighting: max. 4 sec. Length Length Spring: Spring.

By this time I really began to wonder what this thing was, so I made up my mind to go ask the neighbors in whose backyard I had seen the ball to determine if they had been shooting off any kind of special flares, or if they had noticed any unusual activity. The first neighbors, who live at 3437 Greenfield (The Wherrys) met me at their door and stated very nicely and innocently that they had seen and heard nothing, and had been quietly watching television for quite a while. They showed interest that such an event should have occurred in their backyard, but could not add anything to the investigation. The second neighbor involved, who lives at 3441 Greenfield, had not seen anything either and had been inside at the time of the sighting! He seemed interested in the movement of the object as I described it, since it seemed to him (having a background in aerodynamics, apparently) that it was violating principles of gliding or floatation (indicating powered movement.) His initial reaction to my question, "Have you seen a big ball of red light in your backyard?" was, "Are you crazy?"

With this understandable reaction from the neighbors, and not being a bonafide UFO investigator, I felt rather silly to be poking around in someone else's backyard, so this is one thing I didn't pursue -- climbing trees, taking photographs, going
