# MY UFO SIGHTING

By Mary Ann Meadows

My name is Mary Ann Meadows and I live near Cairo Georgia. Cairo is a small town in southeastern Georgia. I have had many sightings of UFO's over the years but this one was particularly significant because there were several witnesses and I was able to get pictures. The camera is a kodak series 35 mm camera useing 1600 ASA film. I took five pictures and only one came out. This sighting took place starting at 10:00 while lieing in bed looking out a window next to the bed. The sighting took place on November 26, 1991.

On this night I was nervous and haveing a hard time sleeping. Then I had a impulse to look out my window and saw a object surrounded by sparks flying off in all directions. At first I thought it was a plane on fire and fixing to crash. Then I looked again and saw that it was still there and not falling. I grabbed my shoes and out the back door I went on this cold winters night. I stood outside looking southeast and the object was hovering at a angle of forty degrees. I watched for about five minutes before going next door to get my landlord. They had company and folks streamed out of the kitchen to have a look as I ran for my camera which was in my car.

I got my camera and ran to a point near my woodpile where folks were already standing watching. They were standing behind me as I began takeing pictures. I could hear them talking as I took the pictures. As I took the pictures the camera was draging as if the bateries were weak. They were new batteries and should have been functioning well. The object apeared to be about the size of a big jet on fire. The object moved from its position in the south east towards us and then turned northernly stoping twice and hovering and changed colors from yellowish white to all red then it changed back to yellowish white moved again stoped changed to all red again then changed back to its origional color and swiftly moved out of sight moveing north.

GEORGIA, CAIRO  
NOVEMBER 26, 1991  
10:00 PM EST

At the closest point this object looked to be comprised of three red balls surrounded by a large red ball of plasma like substance. The object made no sound, all I could hear were dogs barking and people talking. At the closest point it appeared to be about five hundred feet away.

I felt like throughout this experience that there was some sort of communication with this object. I just knew for instance that it was going to come closer in my direction. The folks nearby were saying that maybe it was the space shuttle or some sort of military testing but I somehow knew it was going to come closer and prove them wrong.

There were at least eight additional witnesses to this event. Many may be afraid to come forward for fear of ridicule, but I know what I saw and will try to get these witnesses on the record. Below are the individuals willing to give their names.
